

Hydrogen Peroxide Test Strips

Measuring the HP levels in water 0-400ppm

What: Hydrogen Peroxide Test Strips

Where: Any water sample.

When: Anytime.

Why: Hydrogen Peroxide Test Strips allow you to measure the levels of hydrogen peroxide in any water sample. Use them in conjunction with, and as instructed by, the HuwaSan Help Sheets.

How:

Step 1) Take the test strip from its container and simply dip into the water you wish to test for 1 second

Step 2) Shake off excess liquid

Step 3) After 30 seconds check the test strip against the colour coded scale on the container. Use the appropriate Help Sheet to guide you with regards to what exactly you're looking for.
