

Huwa-San TR3

Surface Disinfection

What: Huwa-San TR3

Where: Huwa-San TR3 spray can be used on any surface where Micro-organisms can colonise and multiply. So, kitchen worktops, bathroom furniture, door handles... Huwa-San TR3 spray is even CE approved for disinfecting surgical equipment.

When: Anytime. There's no need to rinse the product away after applying so using Huwa-San TR3 isn't going to interfere with your daily routines.

Why: Micro-organisms are everywhere and, although many go unnoticed and have no ill-effects, some can cause unsightly biofilm, can produce horrible smells or cause illness and spread diseases. It's better to be safe than sorry and Huwa-San TR3 is a broad-spectrum, no-rinse disinfectant.

How:

Step 1) Remove any solids from the surface you want to disinfect.

Step 2) Spray Huwa-San TR3 directly onto the area. It leaves no toxic residue so there's no need to rinse. Leave to air dry and buff with a soft cloth. In fact, by leaving HuwaSan TR3 in place, it continues working.

Health and Safety

Put simply, independent testing has shown that Huwa-San TR3 is safe to handle and to use.

Put technically! French laboratory, EVIC-CEBA, performed a toxicological evaluation on Huwa-San TR3.

It was tested in accordance with 67/548/EEC and concluded that it's not a skin irritant or a skin desensitiser; it's not dangerous by ingestion and it's not an eye irritant.

Regardless of Huwa-San TR3's fabulous safety record, SAFESOL advocates the use of appropriate safety equipment when using any chemical. Please refer to the MSDS sheet prior to use.

Before using any chemical, you should always reference your in-house Risk Assessments and Method Statements.
