

## 3% Hydrogen Peroxide

### Cleaning Applications

#### What: SAFESOL 3% HYDROGEN PEROXIDE

##### Background

Hydrogen peroxide is a great disinfectant, that is inexpensive and safe for the environment. It's breakdown products are oxygen and water. It is much safer to use around your family than traditional chlorine based products.

##### Cleaning Applications

###### Walls, mirrors, floors and countertops

Spray 3% Hydrogen peroxide on walls, mirrors and counter tops and then wipe as usual. Leaving the solution on the surfaces longer will increase the level of sanitisation.

###### Toilets and WC

Spray 3% Hydrogen peroxide over the toilet rim and toilet brush then wait 5 minutes. Scrub the toilet as usual.

###### Sponges and Clothes

Mix a one part 3% Hydrogen peroxide solution with one part warm water. Soak for 10 minutes. Then rinse thoroughly using running water.

###### Fridges and Dishwashers

Spray 3% Hydrogen peroxide outside and inside dishwashers and fridges and then leave for 10 minutes. Wipe off afterwards.

## Dishes and Tableware

Add 25ml of 3% Hydrogen peroxide to regular washing up liquid to safely eliminate hard to remove stains from your plates and cutlery.

### Health and Safety

3% hydrogen peroxide must be kept out of the reach of children.

Use gloves and safety glasses when working with this product.

Do not ingest. If ingested do not induce vomiting. Give water to drink.

Keep out of eyes: If in eyes rinse with copious amounts of water.
